

Clark Forklift Parts

Clark Forklift Part - Performing worldwide, there are now 350,000 Clark forklifts and lift trucks in operation, with upwards of 250,000 of those in commission in North America. Clark has five main lines of lift trucks across the globe, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specialized components intended for 20 distinctive designs of lift trucks and automated equipment. Your regional Clark Supplier is your total source for availability of all your parts requirements offered by Clark Totalift.

Clark features a exceptional Parts Supply team. The parts warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to offer the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a really outstanding global support network. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the materials handling industry.

Clark proudly remains an innovative leader of the material handling industry, pioneering safety features such as the worker restraint system. This exceptional dedication to safety is now a standard feature on every lift truck.

Clark's recurrent effort to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck maker across the globe to be certified with the internationally approved quality standard ISO 9001 for each and every one of their production plants. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental restrictions, thus placing them in a prevailing industry position.

Clark has preferred the extremely economical and beneficial structure of "Lean Production" for its assembly facilities and application of resources. This structure was established to acknowledge the most efficient method of manufacturing plant stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers join together to perfect the efficiency and brilliance of their merchandise while minimizing costs. The contemporary value engineering agenda combines progressive product improvement and provides improved client support and service within the industry.
