

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Freshly retired, after spending numerous years working with his brother to manufacture their crane business into an industry leader, John had no idea that fatefull trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

All through their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could swiftly and safely elevate people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they built and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into several international marketplaces and continues to develop modern machines to ensure that consumers are able to become safer and more well-organized within their workplace.
