

Advance-Nilfisk Parts

Advance-Nilfisk Part - Think about how long and tiresome it would be to clean-up right after a party, with no assistance from machines. Previously, the dust from upholstery and carpets had to be beat out of them manually; cleaning cloths, brooms, and brushes were the leading cleaning products at the time.

The founder of Nilfisk-Advance, P.A. Fisker, started as an electrical engineer who liked to work on electrical motors. After establishing his business during 1906, he began to produce motors to drive coffee grinders, fans, machine tools and drills. Mr. Fisker's dream from the beginning was to own an international company selling products globally.

The Nilfisk C1 was a remarkable breakthrough for the cleaning business. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed only 17.5 kilos and could be operated by a single person. This invention came in a time where various cleaning equipment were very big and required at least 4 operators, thus, the Nilfisk C1 changed everything and developed the method we clean forever. The mastermind behind these first cleaning machines remains unparalleled. Cleaning machines offer a brilliant solution to an existing problem; things get dirty and must be cleaned regularly, without a lot of effort.

Gradually, the company Nilfisk-Advance expanded throughout the years. During the early nineteen eighties the company developed more rapidly when the company became a part of the NKT Group. With new owners on board, they focused on driving Nilfisk-Advance forward within the trade, aspiring to be an active international player in making professional cleaning equipment. Nilfisk-Advance is currently found in every part of the world due to steadily obtaining numerous smaller businesses in order to grow their product range and presence in new markets. They are really proud to present different cleaning solutions to meet each and every need.
